

Pioneering the Next Era of Enterprise Mobile Security

The world's first hardware-backed, 3-way authentication and data encryption communication platform.

The Architecture of Absolute Trust: 3-Way Authentication™

To compromise protected data, a bad actor must simultaneously breach all three physical and digital fences. This requires computationally impossible effort for a single file.

Hardware Independence

CC EAL5+ Certified Secure Chip embedded in the R2 key. Zero encryption keys stored on the vulnerable open-OS smartphone.

Military-Grade Cryptography

256-bit AES & ECC Encryption.

Key2Key Communication

Direct P2P channel negotiation independent of server bottlenecks.

Ecosystem

Hardware (R2 encrypted iPhone) + Software (R2 App) + Enterprise Key Box Control.

Proven Enterprise Adaptability: From Silicon to Healthcare

Nanya Technology (Semiconductor)

Core Challenge
Facility data access, machine login, and audit management.

I.X Deployment
2FA 3-Key Binding + Non-repudiable Electronic Signatures.

Scale & Impact
Deployed to **500+** critical production line staff. Prevented password sharing and secured highly sensitive IP.

Grape King Bio (Biotech)

Core Challenge
Rapid, secure WFH transition during the pandemic.

I.X Deployment
I.X Secure Browser (Data does not land on the local device) + IT Audit Backend.

Scale & Impact
Protected **200+** key executives and staff operating remotely, ensuring zero data leakage.

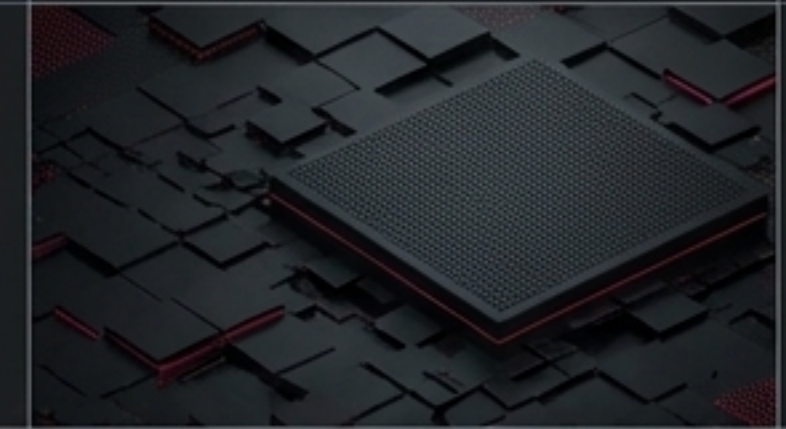

Lee, Tsai & Partners (Legal)

Core Challenge
Client confidentiality and self-managed digital sovereignty.

I.X Deployment
Self-Managed Key Server + Secure Browser.

Scale & Impact
Enabled highly secure remote legal operations, guaranteeing law firm control over encryption keys for ultimate privacy.

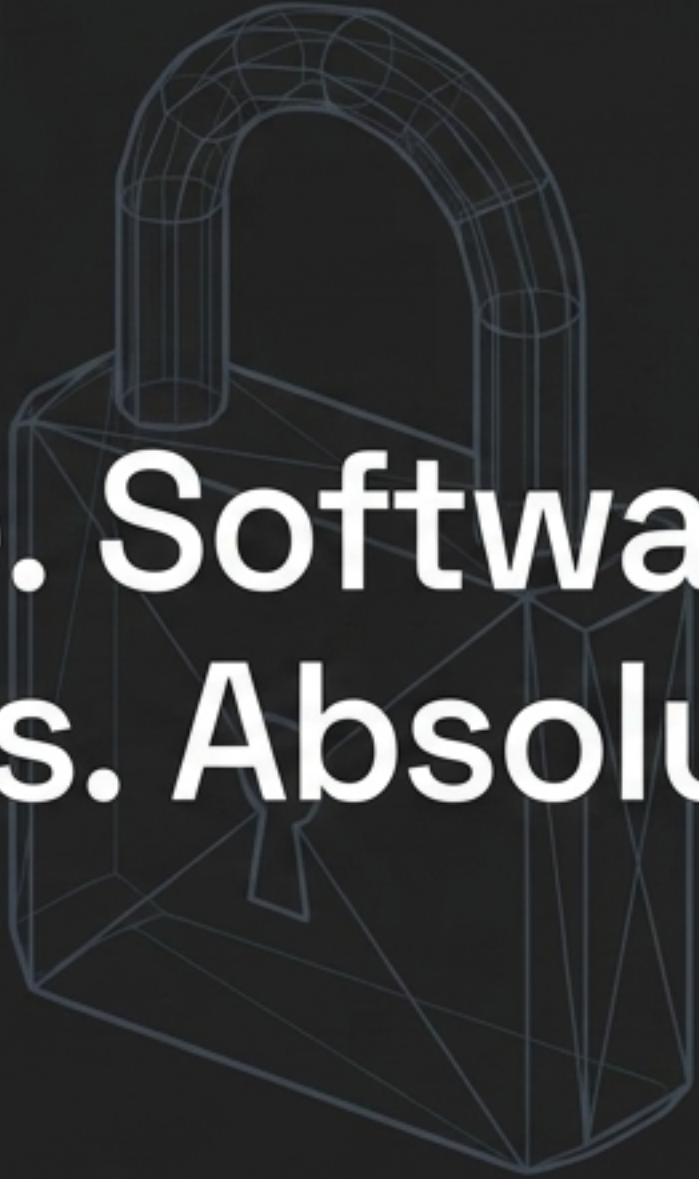

Intellicentrics (US Healthcare)

Core Challenge
Medical privacy, facility access control, and identity verification.

I.X Deployment
Smart e-Badge replacing thermal paper + Medical Record Encryption + Indoor Positioning.

Scale & Impact
Massive scale: **50,000+** members across **8,000+** hospitals. Saved **20 million** pieces of paper and cut hospital entry time by **~15 minutes**.

A wireframe illustration of a padlock, rendered in a light blue color, positioned centrally behind the main text.

Hardware. Software. Cloud. Three fences. Absolute Security.
